

Magic Petals – game description

Developer: AdoreStudio Ltd.

Publisher: AdoreStudio Ltd.

Genre: bubble shooter, puzzle

Mobile app release date: December 2015 (exact date TBA)

Platforms: iPhone, iPad, Android, Facebook

Magic Petals is a bubble-style flower shooting puzzle game with unique pivot action matching mechanics.

Vicky, a little fairy princess, is in need of your help to break the wicked spells and liberate her friends from the captivity of an evil sorcerer. Exploring the flourishing gardens of PetalVille, assemble groups of three or more flowers of the same color and make them disappear from the playing field. Gather an entire bouquet of magic petals in this petallic adventure!

Play this flowery game by yourself or have your friends join you for a competition and see who can get the highest score!

Magic Petals is absolutely free to play, but some in-game items like extra flowers or power-ups will have to be purchased.

Magic Petals stand-out features:

- Ask for boosters - if you're out of boosters, you can request them from your friends and send them back too!
- Bubble mode – use a bubble to catch the flower you need. Shoot the flower you caught at the other flowers;
- Leaderboards to compete with your friends on;
- A relaxing atmosphere of blooming meadows;
- Explore flourishing environments and meet the cutest characters of PetalVille;
- Use magical boosters to help you beat tricky levels;
- Easily sync the game between devices when connected to the Internet;
- Plethora of beautiful, enchanting levels;
- Addicting gameplay: easy to start, tough to get unhooked!
- Ask for lives – if you're out of lives, you can request them from your friends and send them back too!
- Make screenshots of the levels when you outscore your friends and Share your results with them!
